

Delphic HSE Solutions Ltd

Delphic HSE Solutions Limited is a group of experienced professionals working in the fields of Environmental Risk Management, Toxicology, Ecotoxicology, Pathology, Compliance Auditing, Product Development, Environmental Auditing, Risk Assessment, Workplace Safety and Project Management. Senior staff are EUROTOX registered Toxicologists and other assessment staff are qualified in Toxicology, Environmental Management and Workplace Safety. Our Toxicologists are all working towards obtaining or maintaining EUROTOX Registration.

Experienced in all aspects of Health Safety and Environmental work, Delphic HSE can bring over 200 years of combined experience to bear on health, safety and environmental issues, gained through working with Blue Chip Multinational Companies in the United Kingdom and Industry bodies at the national and international level on all six continents.

The requirements of the EU Cosmetics Regulation (EC No. 1223/2009) demand a more comprehensive safety report for

cosmetics covering all aspects of product design, manufacture and performance. In consequence, we are working with other specialist companies to cover all of the Regulation requirements, thus enabling us to act as “Responsible Person” for those clients who wish to outsource all Health and Safety responsibility for cosmetic products. This service became operational in July 2013 when the Regulation came fully into force and currently provides a range of services to clients worldwide to enable them to comply with the requirements of the Cosmetic Regulation. These services include: acting as the third party Responsible Person; notification of products through the EU Commission Cosmetic Product Notification Portal (CPNP); collation, verification and management of Product Information Files along with the review of cosmetic labels and claims substantiation data.
